

IMPORTANT

DO NOT USE POWER DRILL TO INSTALL KLK-E5

Do not use a power drill to install the KLK-E5 keypad.

Do not over-tighten the four mounting screws as this can cause the plastic hard buttons and touch ring to jam and malfunction.

Mounting screws Plastic buttons/ring
KLK-E5 without cover

When installing, tighten the mounting screws just until the keypad does not shift on the wall.

Slightly tighten the screws to allow leveling of the keypad.

Once level, hand-tighten the screws so the keypad is snug to the wall and cannot be shifted. Do not tighten screws to the point they can't turn anymore.
