

TCH1 Firmware Update Instructions

Overview

The TCH1 RNET Touchpoint firmware can be upgraded over the network using the firmware file from the Russound Document Center.

Procedure

1. Download the TCH1 Firmware Update zip file from the Doc Center and save to your computer.
2. Unzip the file.
3. Launch the TCH1 Config 192.168.1.200/admin.html (IP address may vary depending on install)
4. Enter Username and Password (username: admin password: russound)

System Settings

Firmware Upgrade:

Restore Factory Default Settings:

5. Select System>System Configuration.
6. Select the Browse button and select the firmware file that you unzipped (do not select the zip file itself).
7. Choose Upgrade.
8. The upgrade process takes about 3 minutes, after which the unit will reboot.
