Firmware Update for the VM1 Video Matrix

This document provides a comprehensive summary of the VM1 Video Matrix Firmware Update

Recommended for:

- All VM1 Video Matrix installations

Changes from Previous Release:

VM1 Firmware 3.00.01

New Features

Support for low power mode on the MCA-C3 Controller
Resolve switching/tracking source selection after the MCA-C3 wakes from Low Power mode

Known Issues:

- Bug: Video Matrix needs ability to handle a “Page” event
  - Work around: none at this time, may be addressed in a future release

- Bug: Outputs set to ‘none’ still follow default zone settings
  - Work around: none at this time, may be addressed in a future release

Detailed instructions for updating the VM1 and current Firmware files are available on our support site at: www.russound.com
